FULTON COUNTY Department of Health and Wellness, Communicable Disease Prevention Branch

NATIONAL BLACK HIV/AIDS AWARENESS MONTH

National Black HIV/AIDS Awareness Day 2010 is a national HIV testing and treatment community mobilization effort to get Black Americans all across the United States and Territorial Areas to *get educated* about the basics of HIV/AIDS; *get tested* to know their HIV status; *get involved* locally in their community and family to highlight the HIV/AIDS epidemic; and *get treated* if they are living with HIV/AIDS.

FEBRUARY 2010

**Get educated.
Get tested. Get involved.
Get treated.**

Calendar of Events

NATIONAL CONDOM DAY FEBRUARY 14

- Each year in the U.S. there are approximately 19 million new cases of sexually transmitted infections.
- About half of these occur among youth ages 15-24.
- STIs often have no noticeable symptoms and can be contacted from partners who don't have a clue they have an infection.
- Untreated STIs can cause a host of medical complications, including infertility.

Romantic? Not really. But that's the point. Valentine's Day reminds us that a lot of people live in a fantasy world. Seeing as we're one day past that now, isn't it time to come back to reality?
